

Planned Parenthood Affiliates of New Jersey

For 100 years, **Planned Parenthood** has been America's most trusted provider of reproductive health care, sex education, and information to millions of women, men, and young people.

More than **90 percent** of our services include lifesaving cancer screenings, birth control, and testing and treatment for sexually transmitted infections including HIV/AIDS. We are also proud to provide abortion services and we ensure that women have accurate information about all of their options.

Every day, publicly funded family planning services help people get the health tools and information they need to **prevent** unintended pregnancies — or to plan for families when they are ready.

By the numbers:

1 in 5 women in the U.S. have visited a Planned Parenthood health center.

Every year, Planned Parenthood serves more than 90,000 women, men, and teens in New Jersey.

More than 115,000 activists and supporters live in the state.

Family Planning Saves Lives and Money

Every dollar invested in family planning services saves \$7 in associated health care costs in the long run.

In fact, the services provided at publicly funded family planning centers in New Jersey, including Planned Parenthood, help save \$275 million in public funds.

We do this along with other safety net providers in the community by helping patients plan their families, limit exposure to sexually transmitted infections, and address reproductive cancer issues, all which result in savings to Medicaid and other public health programs.

Planned Parenthood Affiliates of New Jersey

Planned Parenthood operates 26 health centers in New Jersey.

Nine of these health centers are located in Medically Underserved Areas (MUAs).

In 2016, Planned Parenthood health centers saw **64,594** patients and provided:

- **96,205** cycles of birth control
- **36,916** cancer screenings, including Pap tests and breast cancer screenings
- **121,118** tests and treatments for sexually transmitted infections, including HIV/AIDS
- Sexual health education and programming to **26,600** teens, parents, and community members

The majority of Planned Parenthood's patients live with incomes 150% of the federal poverty level or less, the equivalent of **\$36,450** a year for a family of four in 2017.
